

10L High speed mixer

Description

10L high speed mixer is mainly suitable for all kinds of PVC, special materials, chemical industry, medicine and other ingredients, mixing, coloring.

—. Using Condition

- Electric resource
380V, 3PHASE, 50HZ
- Plastic raw materials
all kinds materials
- Power : 3.0Kw
- Weight : 260Kg
- Dimension:
1000×500×750mm(length×width×height)

二. Main Parts Specification

Total volume	10L	Mixing blade number	2
Effective volume	7L	Speed	100--1400rpm
Output	2-3kg		
Speed adjust	Stepless speed regulation-frequency control)		
Material temperature	0-200°C		
Heat power	1.5kw-----heating oil 2kg		
Heat temperature	room temperature--150°C		
Loader type	by manual		
Temperature cotrol	Yatai--suitable for K type thermocouple)		
Speed table	Quansheng (100-1400 rpm)		
Base material	Stainless steel		
Blade	Stainless steel and balance treatment		
Running protection	Lid opened, the protective switch is on,mixture is stopped automatically , forced to protect)		
Feeding type	It can feed in advance or after operation, and also increase the additive when the temperature of the material reaches a certain temperature)		
Dust protection measures	Double channel silicone sealing ring, strong dust-proof		
Profile	Integral stainless steel protective cover
