

Two Roll Mill

Description

This machine mainly used in rubber and rubber product, plastic and plastic products. Also used for mixing and color matching in polyolefin, PVC, PP, NBS film, sheet, profiles production and polymer blends, pigments, masterbatch, stabilizer, stability industry.

—. Using condition

- Electric resource
380V, 3PHASE, 50HZ
- Plastic raw materials
all kinds materials
- Power) : 7.5Kw
- Weight : 360Kg
- Size:
1000×600×1050mm(length×width×height)

二. Main parts specification

Output	0.1~1kg
Roller temperature	≤300°C
Temperature controller	RKC Temperature Controller
Heat type	Electric
Roller speed	0-30r/min double frequency control
Motor power	0.75kw×2=1.5kw
Roller size	Ø120×L350mm
Surface treatment	HRC60 High hardness surface plating hard chrome and mirror treatment, non stick material and take off
Roller separation distance	Can be adjusted between 0.1 ~ 5mm
